Happy New Year

Good people, I would like to wish you all a prosperous and limitless new year. Of course wishing for a better year won't make it much better. In fact the likelihood is that most people will make absolutely no progress this year at all and will find themselves in the exact same position this time next year. Same weight, same income, same loveless relationship or still single. Even though they will make resolutions to change all of this, it still won't happen because those resolutions are nothing more than wishes.

Wishing won't make it better!!!!

Rather than wishing for a better year, let me challenge you to create it! We are all creators at heart! The Bible teaches that we were all made in the image and likeness of the creator Himself! This means that we are creative beings and that our capacity to create is unlimited. Creating is what we do.

We can create our own health, wealth and happiness by taking a few tips from God. **Genesis chapter 1 and John chapter 1** will give you the clues:

First the Word. Before you can create anything, you need to imagine it! Get a clear mental picture of the outcome you desire. Take an imaginary journey into the future of your dreams and then describe it in detail. The more detail, the more of an impression it will make on your subconscious mind. If you can plant the vision in your subconscious, then your mind will figure out how to make it happen.

Next is light! 'Let there be light' was the first creative Word of God. Once you have a mental picture of the outcomes you truly desire, then you should go about getting as much information on the subject as possible. Devour books, audios, seminars, pod casts, forums, magazines and newsletters on the subject. Whether its weight loss, relationships, money or business, you can only create in light.

Now put things in place! Notice that once light stepped into creation, the very next thing that God did was to separate things. He separated light from darkness and the dry land from the sea. This is about putting things in their rightful place. It is about making adequate preparations for what's coming next! What things do you need to 'put in place' in order to realise your dreams.

Support your new life! Next thing God did was to create support systems including vegetation, animal life and the stars. All of these were necessary to support life on planet earth. Many people succeed at creating a new life for the month of January and then come February and March they slip back into old routines/systems. The reason is that they never thought about how they would feed and support that new life. So how will you support your new creation? How will you stay motivated and energetic?

Manifest your masterpiece! In Genesis, mankind was the whole point of the creation. The planet was made for us and so was everything in it. Man is God's masterpiece and yet He waited till the sixth day to make him. This is the greatest clue for you and me; if God created the infrastructure before the structure then your systems must precede your success.

In summary, you can create your own world by:

- Developing a clear vision
- Consuming accurate information
- Making adequate preparation
- Developing an effective support system

By doing this you will be able to manifest your own masterpiece!

The reason why many new years resolutions fail is that they focus on success but not on the system that will produce it! If you can create the system, then you can enjoy the success!

Again, I wish you all the best for the new year. Let's **make** it the best year ever!!!

Wayne
